Technisub Look 2 mask with 'LQR' system goes Crystal

Classic and elegant. You already know that the Look 2 and Look midi masks come with carbonic joint buckles, complete with twin button strap quick release and they can be fitted with optical lens. We can now inform you that this best selling mask is available in a new colour scheme comprising both solid and crystal colours. Best of all is the new LQR (Lens Quick Release) system which enables even novice divers to quickly and easily dismantle and reassemble this mask in a matter of seconds! The easiest mask to maintain.

New Aqua Master Professional Sets & Snorkelling brochures 2011/12

Hot off the press is the new 2011/12 'Professional Sets' brochure. Updated to include the new duel HP ports on the Titan LX and Mikron regulators, the outstanding XP-10 dive computer, Aqua Lungs new Express fin range and the ever more popular UK SL3 dive torch. Aqua Master offer a free gift with each set ranging from a Aqua Lung squeeze knife or an AquaLung retractor for the BCD to a Technisub mask.

If snorkelling is your market then check out the new snorkelling brochure to see how the exiting Aqua Lung Sport range can support your business.

View this and all our other brochures on our website or contact our sales team to arrange for your free copies.

Did you know?

Most of the Aqua Lung Bcd; Pro LT, Pro QD, Zuma, Pearl, Dimension I3, Lotus I3 are now equipped with the Flat E-valves.

These valves are designed with an extremely low profile that reduces drag in the water. Flat E-valves utilize a one-way valve to prevent water from back flushing in when all of the valves open at once.

The Flat E-valves are easy to service and can be opened in a second without any tools.

The Flat E-valves are another Aqua Lung innovation.
